Al Nemer Engineering Consultants

# 25 Years

---

## Our experience speaks for itself

During the last two decades the Kingdom of Saudi Arabia has emerged as a modern country in all aspects. In the capital city of Riyadh, the modernization has created a great Demand for high quality consulting in the engineering arena, AL NEMER Engineering Consulting (AEC) has been established in 1993 as a specialized entity in designing and Managing private and commercial projects, to meet the demand for high quality services AEC has developed a work team of professionally qualified engineers both of local and foreign expertise and to utilize the latest technology in designing and managing projects to meet the highest standards.

# Our Services

02

---

# Office services

- **Architecture Engineering**
- **Civil Engineering**
- **Electromechanical Engineering**
- **Industrial Engineering**
- **Urban Planning & Surveying Engineering**
- **Interior Design**
- **Projects Management**
- **Projects Study**
- **Engineering Supervision**
- **Arbitration In Engineering Disputes**

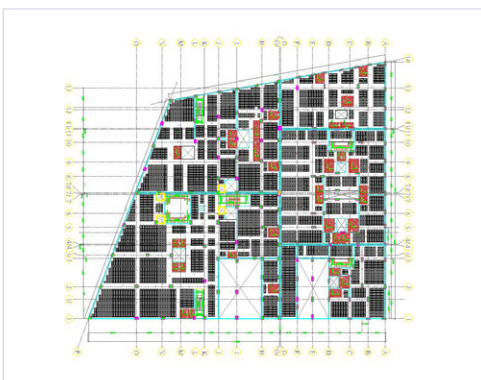

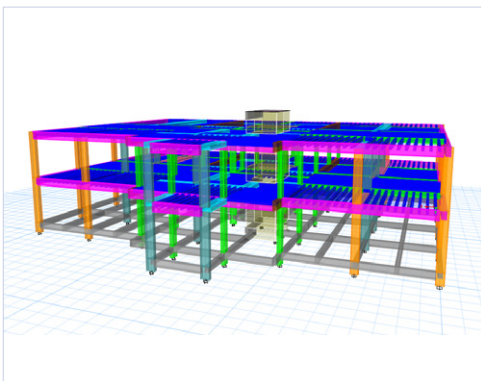

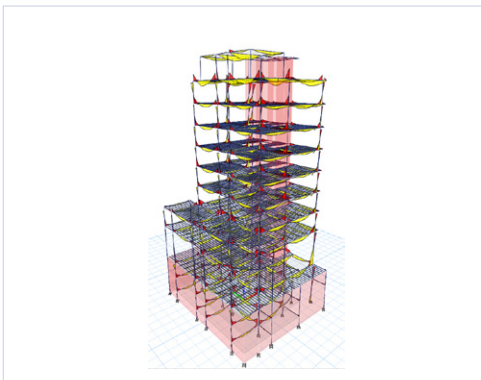

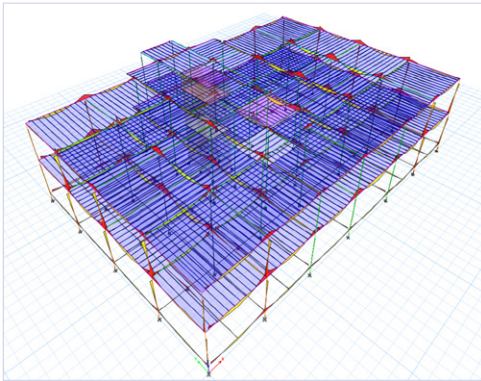

# Architecture

## Architectural Design

Transforming and embodying the thought and imagination of our clients, studying the space to achieve the best architectural design that can satisfy our customers, while applying the Municipality regulations. Utilizing our expertize for over 25 years and more than 5000 projects to obtain the best architectural design.

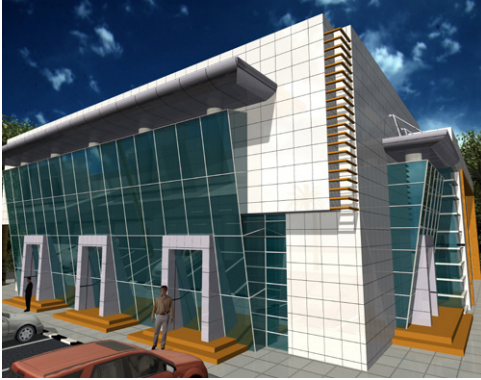

# Civil Engineer

## Concrete Building

Transforming the architectural ideas into reality and insuring design safety, it also seeks to economize the building cost in accordance with the general specifications applied worldwide in all its engineering requirements.

## Steel buildings

The appropriate structural system will be chosen according to the economic conditions of the project and the projects needs, while taking into account the safety and security requirements for design and use.

# Electromechanical Engineering

## Electrical Engineering

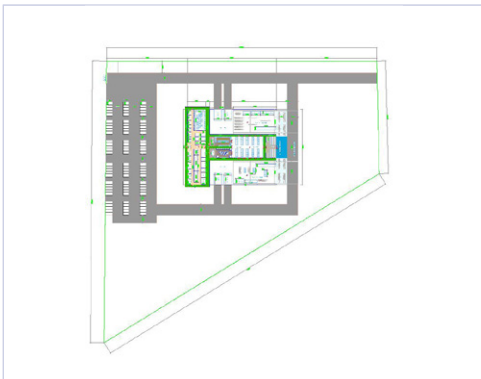

Preparing and making the electrical design and internal circuits and the use of energy and cost reduction while maintaining safe facilities and safe utilization.

## Fire and security systems

Studying the most appropriate ways to achieve the maximum safety of the facilities and workers to help prevent the occurrence of danger with high early warning as well as treating the hazards, as well as applying the requirements of civil defense.

## Air Conditioning Engineering

Due to the weather conditions of the Kingdom of Saudi Arabia we choose the best air conditioning technology, considering the cost as well as maintenance Requirements and finding the appropriate solutions using the best technology.

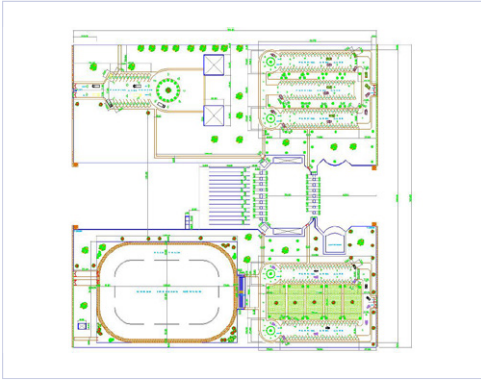

# The Industrial Engineering

- Design of the industrial facility and production lines with the application of industrial requirements to achieve the highest efficiency with the lowest cost for the implementation and operation of industrial facilities, and warehouses.

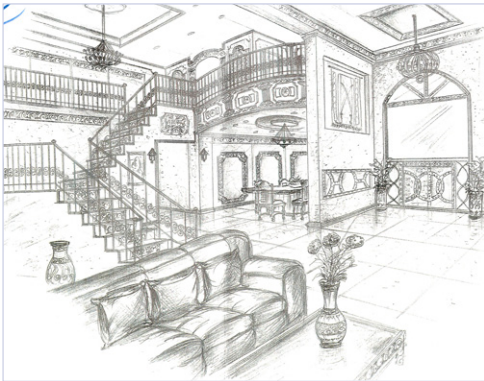

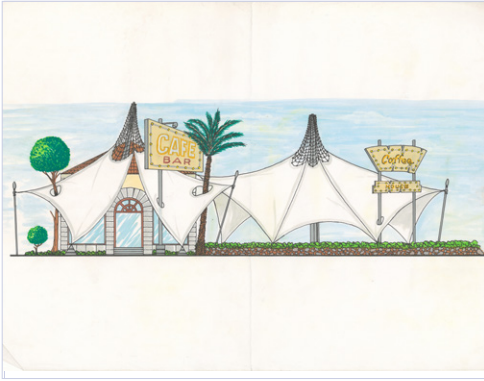

- Study the distribution facility and storage area and services to obtain the best engineering solutions.

## Urban design & planning Surveying Engineering

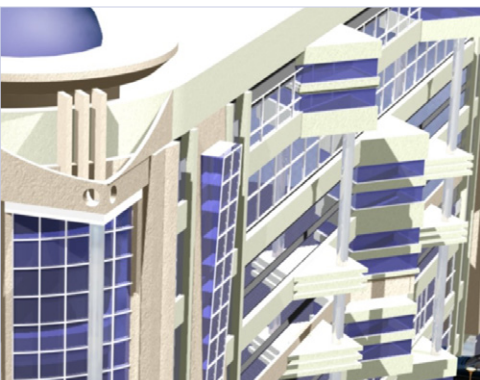

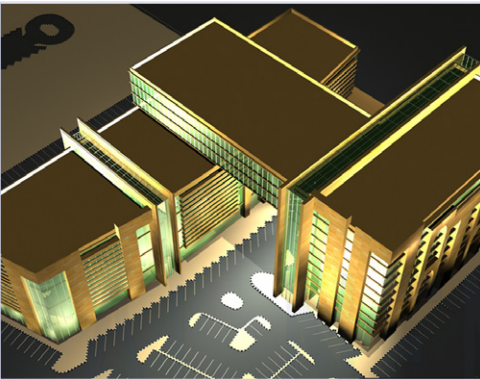

For more than 25 years of experience in the field, as well as surveying and urban planning, while using the geographic information systems (GIS) and all needed suitable machines and human resources. Studying and developing the existing property and preparing all project drawings for studying, improving, and applying to new government regulations.

## Interior Design

The study of architectural design and spaces, to add spirit and aesthetic sense to the building providing positive energy to achieve comfort, harmony and meet the customers vision and the beauty of the facility.

Choose the best and right material to meet the design with cost reduction maintain the interior design beauty with using right material.

## Project management

Keeping accuracy and time in mind, we consider cost reduction in our standards in the study of projects, where we follow-up work on site and develop a plan and timetable for the later stages of implementation, and follow up steps for the project, as well as ensuring the progress of work according to plan. Other than that, we provide project review and restudy of the project to obtain the correct the engineering solutions.

## Project Studying

Conducting engineering feasibility studies of projects implementation and operation costs of the project. Preparing materials list and quantity with general specialization, also developing the suitable project timetable.

## Engineering supervision

- Supervising the project and following-up the work at site to ensure that the implementation is according to the approved plans and the technical requirements to make sure that the project have been done according to the design and specification.
- Review and study the project bill of quantity, specification and design of needed elements and developing the best solution to maintain the project safety.

## Arbitration in engineering disputes

In Our Experience for more than 25 years and over 5000 projects in different engineering fields, and finding the right solution for the project problems and execution with our Experience and knowledge. We lead in the arbitration of engineering disputes and combining the local expert and international engineers with our team.

Our experiences

More than

5000 Projects

---

Have been  
implemented with  
high efficiency by  
Al Nemer Engineering  
Consultants Office in  
various cities within  
The Kingdom of Saudi  
Arabia

---

# Our experiences

More than 25 years of experience Al Nemer Engineering consultant has contributed in providing the best engineering services with high quality and attention to details to meet all the requirements of our customers, with the best ideas according to the various requirements for the different types of projects.

More than 5000 projects experience gained in the Kingdom of Saudi Arabia.

Al Nemer Engineering Consultants provides the highest level of engineering consulting Services from a specialized team of local engineers with international expertise.

---

# Our experiences

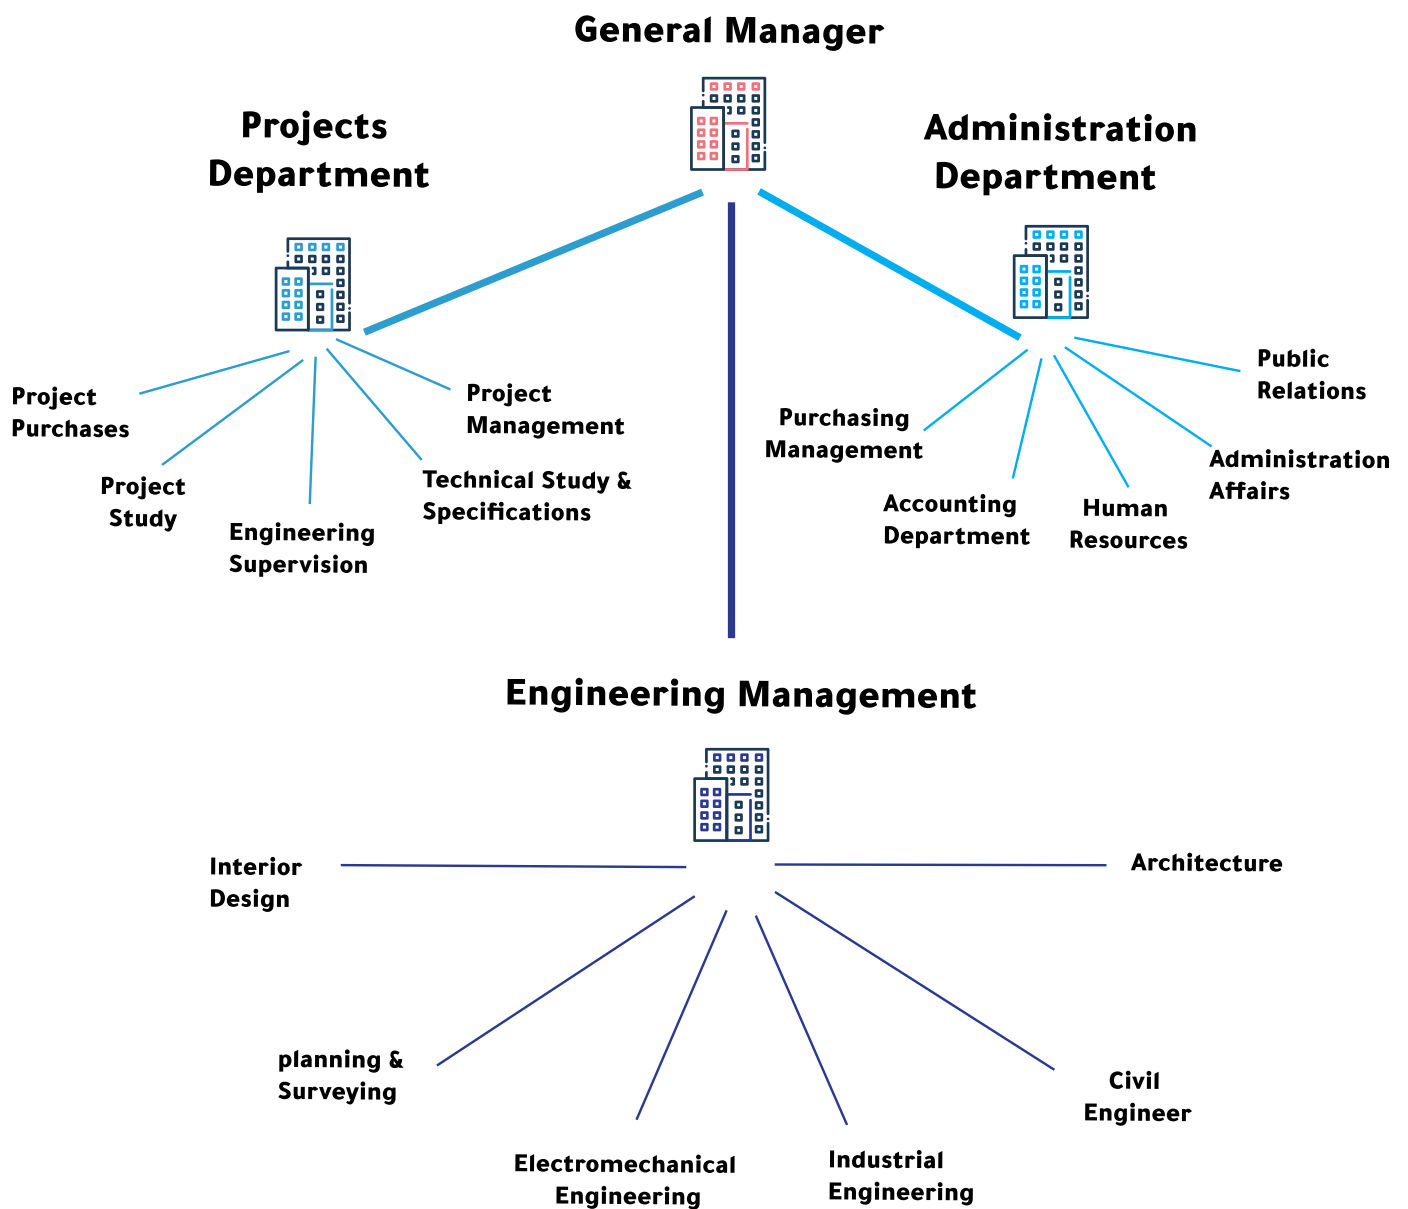

Our experiences varied in all areas of engineering consultancy, including the following:

- **Mosques , and Islamic Center**
- **Residential villas and compound**
- **Commercial and residential Tower**
- **Commercial complexes , shopping Mall and Showrooms**
- **Gas stations and maintenance services**
- **Industrial Building , factories and industrial facilities**
- **Hotels and residential suites**
- **Hospitals , medical and health centers**
- **Entertainment centers and sports facilities**
- **Urban planning and design & Engineering Surveying**
- **Interior Design**

In line with the vision of the Kingdom of Saudi Arabia 2030, Al Nemer Engineering Consultants Office is looking forward to providing the highest level of engineering consulting services to contributing to the development and growth of the Kingdom of Saudi Arabia.
